PROFESSIONAL SUMMARY

Backend Developer with 2+ years of experience building scalable, production-ready REST APIs and microservices using Node.js, Express.js, TypeScript, MySQL, and MongoDB. Skilled in system design, database management, and cross-team collaboration in fast-paced startup environments. Currently pursuing MCA while contributing to live products serving real users.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, Python
Backend: Node.js, Express.js, REST APIs, Socket.IO, Microservices, Sequelize ORM, Git, Docker
Databases: MySQL, Postgres
Frontend: React.js, HTML5, CSS3

WORK EXPERIENCE

Backend Developer — Media Tech Temple Pvt. Ltd. *May 2024 – Present*
Bharatpur, Rajasthan

- Architected backend services for the GearBee ERP platform, including a centralized User & Billing service (authentication, authorization, subscriptions, billing) and modules for Banquet Management, Task Management, and Admin Panel — covering bookings, payments, ledgers, workflows, permissions, and platform control.
- Developed India Sarkari Naukri, a government job listings portal, including dynamic job listing APIs, XML sitemaps for SEO, and category-based services using Node.js, Express.js, TypeScript, MySQL, Sequelize ORM, and Socket.IO.

PROJECTS

GearBee ERP Management *Node.js · Express.js · MySQL · Sequelize · TypeScript*

- Built a multi-module ERP ecosystem covering Banquet Management (enquiries, bookings, multi-event handling, payments, ledgers, service configuration), a SaaS Task Management platform (team hierarchy, task assignment, dynamic workflows, role-based access), a centralized User & Billing service (multi-tenant auth, subscriptions, billing lifecycle), and an Admin Panel for centralized control over clients, subscriptions, and platform services.

India Sarkari Naukri *Node.js · Express.js · MySQL · Sequelize*

indiasarkarinaukri.com

- Built a government job listings portal (Railway, Bank, SSC, Police, state-level) with dynamic listing APIs, automated XML sitemap generation for SEO, modular category filtering, and admit card/result/notification tracking modules.

HRMS Software *Node.js · Express.js · PostgreSQL · Redis · React js ·*

indiasarkarinaukri.com

- Independently developed a full-stack HRMS (Human Resource Management System) covering employee records, attendance, leave management, and payroll workflows — building both the Node.js/Express.js backend and the React.js frontend.
